Jennifer Jillson Soper
Division of Conservation Services
100 Cambridge Street, Suite 900
Boston, MA 02114

Dear Ms. Jillson Soper:

I am writing to you on behalf of the Town of Boxford in support of its application for a Massachusetts Self-Help Program & Federal land and Water Conservation Fund FY 08 Grant Application for Cargill Fields.

At the present time, the Boxford Trails Association and the Boxford Open Land Trust is under an Option Agreement for the Town of Boxford to acquire 14.5 acres of the most visible and environmentally significant property in the heart of Boxford Village. This property is located at the corner of Middleton Road and Main Street, across from the Cole Elementary School and is enjoyed by hundreds of citizens on a daily basis and offers many important values to the Town worthy of conservation.

The proposed project will contribute significantly to the protection of drinking water supplies. The northwestern corner of the site is included in the Interim Wellhead Protection Area of the Cole School public drinking water supply well, and would be further protected from development as a result of the proposed project. This land abuts Fish Brook and Howe's Pond and protects this important watershed. Fish Brook is listed as a cold water fishery and is stocked with trout by the Massachusetts Division of Fisheries and Wildlife. Runoff from this site flows to Fish Brook and then to the Ipswich River, which has been identified as "Highly Stressed" by the Massachusetts Water Resources Commission and as one of the three most endangered rivers nationwide by American Rivers. This land also contains a drinking water protection area for the Cole School and the land may be used as a future well site for the School.

This parcel connects to the Essex County Greenbelt land and Haynes' Field, extending an important corridor of open space. In addition, the land preserves the farming character of Boxford Village and is recognized as a scenic vista by the Essex
